

2018 Catalog

MVP Disc Sports was founded in 2010 with the mission of growing disc golf by producing high-tech premium discs. Utilizing patented GYRO® Overmold Technology and Fission™ Microbubble Technology, MVP has established itself as the Leader of Disc Golf Technology. In 2014 we launched a sister company, Axiom Discs, to focus on the style and aesthetics of GYRO® Overmold enhanced discs. In 2017 we launched another sibling company, Streamline Discs, to bring our style of innovation to the solo-mold disc market.

We invite you to explore this introduction to our company, products, and processes to see how we've applied our high standards to all aspects of the disc golf industry.

If you have any questions we invite you to contact us at sales@mvpdiscsports.com or to call 844-MVP-DISC (844-687-3472).

Sincerely,
The MVP Disc Sports Team

Neutron

MVP and Axiom both feature our flagship material, Neutron. An opaque and grippy blend, Neutron is available in the greatest number of models for each brand in a variety of vibrant colors. MVP Neutron features all black GYRO® rims, and Axiom Neutron features a range of color GYRO® rims.

MSRP \$17.95

Proton

Our original premium plastic blend, Proton is a translucent core material with stunning optical clarity and vibrant colors. Proton has similar durability and slightly more grip than our Neutron plastic. The colorful candy plastic core yields a different aura to each model and especially suits LED-lighted night play (MVP Tri-Lit LEDs available). All MVP Proton will feature a black GYRO® rim, while Axiom Proton features a vibrant color rim for eye-catching Optic™ effects. Select putters are available in a special Proton Soft plastic.

MSRP \$16.95

Eclipse

Players wanting a night round or just some highly-visible plastic can choose Eclipse™ Glow, a configuration that pairs our vivid Proton core with a white, glow-in-the-dark, GYRO® rim. These are the only regular production non-black rims in the MVP lineup. Eclipse™ is currently exclusive to MVP Disc Sports. There is truly no other glow disc like Eclipse™, with its glowing outer ring providing consistent flights from your daytime rounds into the night without requiring additional glow tape or lights.

MSRP \$20.95

PLASMA

Plasma is a specialty premium blend, known for its unique visual appeal with metallic and color-shift options, as well as its superb semi-gummy grip. Few premium materials grip this well, and none other look as cool. We have specially engineered some Plasma drivers for additional glide and a softened stability.

MSRP \$18.95

FISSION™ MICROBUBBLE TECHNOLOGY

Fission™ is our breakthrough lightweight material. Fission™ Microbubble Technology can be used to create an exceptionally stable ultralight disc, or to increase the GYRO® effect in a medium weight disc. Fission™ is opaque with a matte finish. Despite any comparisons, Fission™ is in a class by itself as the only lightweight/bubble plastic to ever address weight distribution. Sellers and throwers are constantly amazed that Fission™ exceeds the low expectations set by single-piece lightweight discs.

MSRP \$18.95

Electron plastic

We strove to reinvent “baseline” with our innovative Electron plastic. This ultra-grippy all-weather material will wear its battle scars with pride and fly straighter with each hit. While retaining the GYRO® effect for superb line-holding, the matte texture of Electron produces exceptional grip for confident putting and throwing. Although a premium disc twice-molded with precise blends can hardly be considered “base”, Electron is most similar to chalky baseline putter blends on the market. Electron comes in a regular, Soft, and Firm variations to help you find that perfect feel and grip you can trust.

MSRP \$12.95

 AXIOM DISCS

MAYHEM

Straight-Stable 23mm Driver

Mayhem has a responsive straight-stable profile and plenty of speed, making it a perfect workhorse driver for many advanced and expert throwers. Like the MVP 23mm class, the Mayhem has a pronounced dome to promote distance-covering glide.

the Science of GYRO®

the EDGE

The disc's leading nose tip is narrow, but also furthest away from the center of rotation.

the RIM

The GYRO® rim adds weight to this outside edge, which then increases rotational inertia.

the ADVANTAGE

With optimized gyroscopic properties, the aerodynamic phases of flight are prolonged, yielding longer lines.

the OVERMOLD

Ultra Dense Plastic Blend
Chemically Bonded

the CORE

No Weight Added

GYRO®-enhanced

non-GYRO®

the DIFFERENCE

Conventional golf discs focus bulky mass on the inner rim, but our light inner rim allows that weight to be shifted outward, for unprecedented focus at the outer rim.

GYRO® Phases of Flight

- GYRO® Fade
Forward fade at spindown
- Aerodynamic Fade
Disc pulls out of turn as spin decreases
- Aerodynamic Turn
Aerodynamic profile turns disc during the late high-speed phase
- GYRO® Push
Inertia carries the disc forward during initial high-speed phase

MVP Flight Charts describe the flight of GYRO® discs with variable lines according to power and direction of spin.

GYRO® Technology : Reinventing the Look of Performance

FISSION™ MICROBUBBLE TECHNOLOGY

Optimizes

- Weight Distribution
- Core:Rim Density Ratio
- Total Disc Weight
- Glide & Stability

GYRO®

OVERMOLD TECHNOLOGY

The GYRO® Difference

GYRO® is about moving mass outward.

The earliest flying discs were highly gyroscopic, with a bulky narrow rim at the edge of a thin plate. As golf discs evolved into a modern triangular rim shape, that gyroscopic potential has diminished as the bulk moves inward.

With a single plastic, the disc's mass is focused on its fat inner rim. A GYRO® overmolded disc takes weight away from the bulky inner core and rim wall, and slams mass all the way out to the leading edge.

This stabilizes the disc for better line-holding accuracy, helps act against wind disturbance, and retains spin longer in flight for a forward finish.

Counter-Clockwise
LHBH Left-Hand Backhand
RHFH Right-Hand Forehand

This chart only shows Clockwise flights. Consider a mirror image result for most Counter-Clockwise flights.

GYRO-X™

Overstable 24.5mm Distance Driver

Limit

With an overstability quotient just under that of the Energy, the Limit's speed and stability couple to make a usable but forceful driver. Even high power throwers will see a fade begin quite early in flight, so the Limit is not recommended for average or beginner throwers. Whether you've got the power, or can use an underpowered machine for trick shots, the Limit is a force of nature by which all high speed overstable drivers can be measured.

Stable-Overstable 24.5mm Distance Driver

Dimension

The Dimension balances overstable resistance to turn while allowing a full flight before fade. In a universe of infinite possibilities, a reliable fade certainly helps pinpoint your landing from a great distance, and that's what the Dimension guarantees. Strong throwers will see only the smallest turnover at high speeds or into headwinds.

Straight-Stable 24.5mm Distance Driver

Teleport

The Teleport's straight-stable design produces a tight S-curve at high speeds, with plenty of stability to keep it headed toward its target. While high power throwers and headwinds can produce these shallow turnover lines, average throwers will get a long and manageably resistant driver in the Teleport. Within the context of the 24.5mm class, Teleport has the most distance potential for the most throwers in the core distance slot.

Understable 24.5mm Distance Driver

Relativity

The Relativity has a useful understable profile that allows controllable turnovers, rollers, and high line distance shots. While its net landing spot will normally be to the understable side of its launch point, the Relativity's high speed design forces an ending fade that nicely pans out of turnovers and high lines to prevent unwanted rollers.

Energy

Overstable
23mm Distance Driver

The Energy is our fastest and most power- and turn-resistant distance driver. Power throwers will be able to unleash their arms into the wind with confidence given the Energy's speed and overstability. Average to low powered players may not get the same distance potential with Energy as other 23mm or 21.5mm drivers, but Energy can function as a utility disc for skips or overhands when underpowered.

Neutron

Nitro

Stable-Overstable
23mm Distance Driver

The MVP Nitro is a stable-overstable distance driver from the new high speed 23mm class. Nitro falls in the general stability lineage of Servo, Volt, Tesla, and Photon, with a turn-resistant profile that covers ground and guarantees a fade finish. Average throwers may need lighter weights or headwinds to achieve what little turn is offered by Nitro, while power throwers will find a workable and responsive shallow turn.

Neutron

Octane

Stable-Understable
23mm Distance Driver

The MVP Octane is a stable-understable distance driver from the new high speed 23mm class. Octane falls in the general stability lineage of Switch, Amp, Inertia, and Wave, with a slight-turn profile that holds long and straight until its fade finish. The 23mm Octane is designed to be relatively less understable than its 21.5mm counterpart Wave. Average throwers should see straight flights with fade, while power throwers will be able to hyzerflip for max distance and tailwind lines.

Neutron Proton Eclipse PLASMA

Catalyst

Understable
23mm Distance Driver

The Catalyst is a perfect starter for big distance. Its stability profile lends itself to being incredibly useful even when underpowered. Catalyst is relatively less understable than its 20mm counterpart, the Orbital. High power throwers will be able to control rollers, sky anhyzers, and tight turns, while average to low power players will get easy distance with great glide, and a power responsive amount of turn-to-straight.

Neutron Proton PLASMA

Overstable

21.5mm Distance Driver

Phase

The Phase caps off the acclaimed 21.5mm Distance class. Fans of the Photon, Motion, and Resistor will love the power resistance and wind-fighting characteristics that make the Phase perfect for throwing strong lines in any wind condition, with absolute confidence in its overstable finish. Forehanders, big arms, and those facing a windy line will appreciate what the Phase adds to their arsenal of reliable options.

(N)eutron

Stable-Overstable

21.5mm Distance Driver

Photon

The Photon is best described as a longer Tesla, with power throwers able to achieve some flight extending turn, and all throwers getting a reliable fade. The Photon is naturally headwind resistant but average power throwers can use a headwind to emulate those extended flights of high power throwers.

(N)eutron (P)roton PLASMA
FISSION

Stable-Understable

21.5mm Distance Driver

Wave

The Wave is best described as a longer Inertia, with a stable-understable flight profile and a responsiveness that makes it useful across the power spectrum. Available in weights 175g - 155g, the Wave is the type of driver that players may bag in two or more weights for shot variety. For the most powerful throws, long gliding turnovers and hyzerflip gut shots are possible with the Wave. For average powered throws the Wave will simply extend a variety of lines, from anhyzers to hyzerflips to headwind-assisted turnovers.

(N)eutron (P)roton PLASMA

Understable

21.5mm Distance Driver

Orbital

The Orbital is designed as the most understable driver in the acclaimed 21.5mm Distance class. Fans of the Wave, Inertia, and Impulse will find a familiar highly responsive character in the Orbital, as it can be manipulated onto a variety of lines relative to power level and release angles. Smooth throwers and those with modest driver power will maximize straight distance flights best with the Orbital. Power throwers will discover a range of roller, sky turn, and low ceiling finesse lines

(N)eutron

Motion

Overstable
20mm Distance Driver

The Motion is designed to resist turnover from power or headwind during a long straight travel, followed by a reliable fade. Fans of the Resistor will appreciate the Motion's extended distance with familiar characteristics. While it serves as a utility driver for average-power throwers, high-power throwers will find a trustworthy straight-to-overstable distance workhorse. Forehand throwers will find its overstability especially useful for torque resistance.

(N)eutron

Tesla

Stable-Overstable
20mm Distance Driver

The Tesla's responsive design balances a subtle turn and reliable fade, while a pronounced glide and forward finish gain extra distance. The Tesla extends high power or headwind lines and has plenty of bite to fade back reliably and reduce lateral drift. The Tesla can be considered the big brother to our acclaimed Volt fairway driver. Choose the Tesla for long-range pinpoint accuracy.

(N)eutron (P)roton PLASMA
FISSION

Inertia

Stable-Understable
20mm Distance Driver

The Inertia is the grand debut of our 20mm-wing distance driver class. This class of controllable distance drivers will all have a wide weight range from 155g to 175g. This allows for an unmatched GYRO® Push to give throwers increased control in their distance drives. The Inertia's understable profile will allow high power throwers to achieve consistent hyzerflips that will carry far and accurately. Its Neutral flight for low power throwers will allow for reliably straight distance lines with accuracy.

(N)eutron (P)roton PLASMA

Impulse

Understable
20mm Distance Driver

The Impulse completes our 20mm-wing distance driver class. This class of controllable distance drivers all have a wide weight range from 155g to 175g. This allows for an unmatched GYRO® Push to give throwers increased control in their distance drives. The Impulse's understable profile will allow high power throwers to achieve controllable hyzerflips that will carry far and accurately. Its Neutral to Understable flight for even low power throwers will allow for reliably straight to turnover distance lines with accuracy.

(N)eutron

Overstable 18.5mm Fairway Driver

Shock

The Shock is great for those long fairway lines on windy days. It has very little turn even for both high power throwers and headwinds. It will get the job done when it is too windy for the Volt to be your go to driver.

(N)eutron

Stable-Overstable 18.5mm Fairway Driver

Volt

The Volt is geared for long, accurate placement shots. The Volt can hold a long straight line and with a solid, forward penetrating fade. Reach for the Volt when accuracy is needed on long, tight fairways.

(N)eutron (P)roton (E)clipse
PLASMA FISSION Electron

Neutral-Stable 18.5mm Fairway Driver

Amp

The Amp has a controllable turn with substantial glide and a subtle fade. It is excellent for both high and low power players looking for easy, controllable distance with accuracy.

(N)eutron (P)roton (E)clipse
PLASMA

Overstable 17mm Fairway Driver

Resistor

The Resistor is part of a new slower family of fairway drivers with a more controllable speed. The combination of its flat overstable profile and GYRO® technology allows it to resist turn and experience a strong reliable fade.

(N)eutron

Servo

Stable-Overstable
17mm Fairway Driver

The Servo is part of a new class of fairway drivers with a lower power requirement and more controllable speed. Its extended GYRO® Push yields a straighter lateral movement and immense glide with an effortless forward fade. Both high- and low-power throwers alike will achieve easy pinpoint accuracy with ultimate line control, making the Servo their go-to placement driver in the fairway.

Neutron PLASMA

Switch

Stable-Understable
17mm Fairway Driver

The Switch is part of a new class of fairway drivers with a lower power requirement and more controllable speed. Its extended GYRO® Push and understable profile offers smooth controlled turnovers and a delayed minimal fade. This disc will excel with its ability to cruise for low power throwers. The controlled turnover in conjunction with minimal fade allows for superb accuracy in tight fairways.

Neutron

Relay

Stable-Understable
16mm Fairway Driver

The Relay features a slim 16mm wing that feels extra chunky in the hand while still being our easiest to grip driver. While advanced and expert throwers will have a healthy flip and turn to carve with, beginner to average disc golfers will get a controllable straight flyer that doesn't need much power. The Relay's low speed demands make it the easiest MVP driver to throw for beginners, and the best all-around "powered-down" disc for experts.

Neutron

Signal

Understable
16mm Fairway Driver

The Signal is an extremely understable and relatively low-speed fairway driver, which makes it incredibly easy to throw for newer players. Thrown at high power, the Signal begs for lines to be worked through hyzer-flips and height adjustments, yielding everything from laser beams to smooth turns and rollers on demand. All this turning potential is buffered by the stabilizing GYRO® effect for a controllable golf disc.

Neutron

Stable-Overstable 13mm Midrange Driver

Vector

The Vector combines a classic stable-overstable midrange rim with GYRO® Technology to provide long straight lines with a late and predictable fade. Vector will fight winds with a straight travel and can handle high-powered throws for maximum accuracy on those hard-to-reach midrange lines.

(N)eutron (P)roton (E)clipse (G)electron

Stable-Overstable 13mm Midrange Driver

Matrix

The Matrix is designed to resist turnover for all power levels and situations, and its stability is best described as a longer Axiom Envy. Matrix should have a long straight travel for most throwers, followed by a dependable fade. While this is not a "meat hook" style overstable midrange, its utility is not to be underestimated. Release angles make all the difference with this type of midrange, yielding useful flights on releases from anhyzer to flat and hyzer.

(N)eutron (P)roton

Neutral-Stable 13mm Midrange Driver

Axis

Great glide and tight line-holding accuracy has made the Axis a standby in MVP bags. While its classic design can be thrown with ease by newer players, it can also accept high-power throws for maximum accuracy on those distant approach shots.

(N)eutron (P)roton (E)clipse

Tensor

Overstable
12mm Midrange Driver

The Tensor will exhibit reliable high-speed stability for power throwers and is great for approach shots on windy days. The Tensor has outstanding glide coupled with its great high-speed stability, always followed by a dependable fade.

(N)eutron

Tangent

Stable-Understable
12mm Midrange Driver

Low power throwers will find this disc to be great for easy neutral lines and effortless glide. The Tangent features a smooth profile that offers a sleek modern feel, and will fit your hand like a glove.

(N)eutron (P)roton (E)clipse

PLASMA

Vertex

Stable-Understable
12mm Midrange Driver

The Vertex is a utility midrange with an array of understable tricks ready to lower your scores. It's more understable than its Axiom Theory cousin, but has a nice ending fade to settle it down at your target. Specialty uses include high gliding lines, hyzerflips and turnovers, and low-power escape shots where easy precise distance matters.

(N)eutron

Ion

Stable-Overstable
11mm Putt & Approach

The Ion's beaded rim design makes it a straight to overstable flier. Power putters can use the Ion with confidence. It is capable of holding long powerful lines with a late subtle fade. This makes it a very versatile putter that can be used in all conditions.

(N)eutron (P)roton (E)clipse

Electron + SOFT PLASMA

Neutral-Stable

11mm Putt & Approach

Anode

Clean putting releases and straight flights make the Anode our most accurate putter. Long smooth hyzer and anhyzer lines are made easy with the Anode as an approach disc.

Great glide contributes to its ability to adapt to any putting style.

Neutron

Proton

Eclipse

PLASMA

**Understable**

11mm Putt & Approach

Spin

The Spin has a deep profile like the Ion and Anode, which makes it great for glide-filled lofty flights. Its controlled understability makes it suitable for both new and advanced players alike.

Electron

Proton

**Straight-Stable**

10mm Putt & Approach

Atom

The Atom is a straight flyer with enormous potential off the tee and on long approaches. Right off the shelf, the Atom has a neutral stability with just a bit of fade. Over time the Atom will wear in to an extremely straight and floaty putter. The Atom combines Electron baseline putter plastic with the extended flight phases of GYRO® Overmold Technology, producing a tactile and controllable go-to putter.

Neutron

Proton

Electron

SOFT / MED / FIRM

**Stable-Overstable**

10mm Putt & Approach

Particle

Particle is best described as flying like a more overstable Envy, able to handle wind and a long straight travel before a guaranteed fade. As with all MVP and Axiom 10mm class discs, the Particle has a mildly shallow height that makes it fast in the air and easy to throw cleanly without wobble

Neutron

+ SOFT

MACRO SCALE DISC
15CM DIAMETERSTANDARD GOLF DISC
21CM DIAMETER

Macro Tesla

Straight-Stable
Macro Disc

The Macro Tesla is an 80g and 15cm diameter version of the famed MVP Tesla driver, designed for Macro Disc Golf with the upcoming Black Hole® Macro Basket. Macro discs conform to the PDGA maximum diameter for mini markers, but are much easier to grip and throw naturally than mini discs. The Macro Tesla has plenty of stability to handle a full-bore rip, and has been tested at extraordinary distances by our design team.

MSRP \$4.95

(N)eutron (P)roton (E)clipse

Metal Mini Discs

Introducing the MVP & Axiom Metal Mini Drivers and Micro Mini Drivers, perfect as collector pieces or as the go-to marker for your game. Available in six colors. Both sizes are machined from high quality aluminum into a sleek driver profile. Whether you like the heavy metal or a lighter model, there's a PDGA legal metal marker for you. Standard metal minis are 10.5cm in diameter and 100g. Micro Minis are 7cm in diameter (PDGA marker minimum) and just 30g.

MSRP \$4.95

Please note: Metal Minis are dangerous if thrown and are meant for display/marketing only

Nano

Straight-Stable
Mini Disc

The Nano is a mini disc suitable for playing mini disc golf or as a marker in competitive disc golf. It bears the same premium quality, aesthetics, and high production standards as our golf discs in half the diameter. Mark your lie in style, and reinforce that all-important confidence in your plastic. For those who enjoy throwing mini discs, the Nano has a versatile straight-stable flight that can be used for low-power indoor throws as well as high-power outdoor throws. The Nano is a must-have for every MVP thrower.

(N)eutron (P)roton (E)clipse

PLASMA

Icon

Neutral-Stable
Mini Disc

The Icon's wing is designed to fly slightly more understable than the MVP Nano mini disc. The Icon is perfect for indoor play, mini games, and of course marking your lie with style.

(N)eutron (P)roton

Electron Starter Set Pack

The MVP Electron Starter Set offers a budget friendly introduction to the unique flight and style of MVP Disc Sports. Each boxed set includes three MVP discs - one putter, midrange, and driver - in an assortment of Electron and its Soft and Firm blends. These make excellent gifts for those who have never played, as well as disc golfers curious about the MVP Electron lineup and MVP fans looking for an easy booster pack. The MVP Electron Starter Set is packaged in a heavy duty cardboard box with awesome full coverage color MVP graphics, sized approximately 9" x 9" x 2".

MSRP \$34.95

Premium Starter Set

The MVP Premium Starter Set offers an easy introduction to the quality and style of MVP Disc Sports. Each boxed set includes three MVP discs - one Electron putter, and one midrange and driver in an assortment of our Premium plastics: Plasma, Neutron, and Proton. These make excellent gifts for those who have never played, as well as disc golfers who don't know what to try from the MVP lineup and MVP fans looking for an easy booster pack. The MVP Premium Starter Set is packaged in a heavy duty cardboard box with awesome full coverage color MVP graphics, sized approximately 9" x 9" x 2".

MSRP \$39.95

10 Disc Assortment

Mine those hills of gold with our assortments of 2017 Circuit stamped discs while supplies last. These random assortments may include: Plasma Octane, Plasma Catalyst, Proton Atom, Neutron Teleport, and Neutron Relativity. There's no weight, model, or color preferences to be found in a random assortment, but at these prices, you'll find an eager buyer for everything in your 2017 Circuit stash.

MSRP \$13.95 per disc

GLOW THE SPORT

Love glow golf or want to give it a try? MVP has everything you need from glow discs, lights, and accessories. Players looking for glow discs or just some highly-visible plastic can choose Eclipse™ Glow, a configuration that pairs our vivid Proton core with a white, glow-in-the-dark, GYRO® rim. If you are looking to add some glow to your standard discs, MVP offers two options, the MVP Tri-Lit LEDs and UFO Glow Rings. The Eclipse™ glow rims and UFO Glow rings pair perfectly with the powerful MVP UV Flashlight to instantly activate a bright and lasting glow. With your plastic lit up, its time to light the target! MVP Fusion Sticks are a fast and affordable way to light your basket, simply crack the glow core to activate and clip on to your bag or basket for a glow that will last the entire round. For a reusable option, MVP offers the Event Horizon and Lunar Module LED basket lights.

Keep the game going after dark with MVP's line up of glow products and Glow The Sport!

MVP Tri-Lit LED Lights

UFO Glow Vinyls

MVP Lunar Module LED Basket Light

TRACE

NOW AVAILABLE IN
PLASMA

The Plasma Trace has a natural stability in between its Neutron and Proton versions - fairly straight with a shallow turn and gentle fade. Intricate triple-foil stock artwork adorns the Plasma Trace with a retrofuturist ideal of air travel in a sleek flying saucer.

STREAMLINE DISCS

We broke the mold with MVP and redefined its beauty with Axiom.
We see what's out there, and we can do it better.

Streamline Discs — familiar plastics,
exciting solo-mold designs, stock multi-foil stamps —
all at lower prices than anyone.

Stable-Understable 10mm Putt & Approach

Pilot

Speed	Glide	Turn	Fade
2	5	-1	1

The Pilot has a medium-depth grip, small-bead wing design, flat top, and a comfortable rounded nose. The Pilot's feel in the hand with grippy Electron plastics will inspire confidence, while its dead straight flight takes you right to the pin. MVP throwers will find the Pilot's depth in between the Atom and Anode, and its flight most similar to a seasoned Anode.

 **Neutron**  **Electron**
+ SOFT

Straight-Stable 21mm Distance Driver

Trace

Speed	Glide	Turn	Fade
11	5	-1	2

The Trace has a manageable 21mm rim width and straight-stable flight that places it squarely in the Speed 11 Power Straight market. The Trace's moderate dome is smooth and even, with a shoulder and depth that yields excellent glide. Most players will be able to stand the Trace up on a hyzerflip, but the Trace will soak up plenty of power before being pushed off its straight line. Its ending fade is smooth but dependable for easy ranging.

 **Neutron**  **Proton** **PLASMA**

Axiom Discs feature MVP's

GYRO®
OVERMOLD TECHNOLOGY

heavier rim, lighter core.
old school disc physics meets
the modern beveled wing

AXIOM DISCS

Axiom Discs models represent a system of complementary flight characteristics.

Although every thrower is unique, the relationships between models should remain constant for all users.

Rather than assign numeric values, we illustrate a spectrum of flights thrown flat from high to low power.

Trust your throwing style and angles to interpret these flight descriptions. Your results may vary.

Direction of Spin

Clockwise and counter-clockwise disc rotations produce opposite side-to-side movements and ending fade.

Clockwise
RHBH Right-Hand Backhand
LHFH Left-Hand Forehand

Counter-Clockwise
LHBH Left-Hand Backhand
RHHF Right-Hand Forehand

This chart only shows Clockwise flights. Consider a mirror image result for most Counter-Clockwise flights.

PLASMA

www.axiomdiscs.com

Overstable

23mm Distance Driver

Expert throwers will find the Panic reliably stable into a head-wind, while average throwers will get a fully turn-resistant high speed option. Compared to the MVP 23mm models, Panic is more overstable than Octane, but not as extreme as the Nitro.

Panic

Straight-Stable

23mm Distance Driver

The Mayhem is a new high-speed distance driver from Axiom Discs. Mayhem is the straight-stable disc of a three-model 23mm class to be released in 2017. Like the MVP 23mm class, the Mayhem has a pronounced dome to promote distance-covering glide. Expert throwers will find the Mayhem ready to stand up and boom or drift over from flat, while average power throwers will be able to mash on it without fear of unmanageable turn.

Mayhem

Understable

23mm Distance Driver

Average and developing throwers will find a highly usable straight-with-fade driver in the Tenacity, while expert throwers will need to call upon that expertise to adjust hyzer angle and shot height. With proper form the Tenacity easily qualifies as "sneaky long". Tenacity is best compared to a worn MVP Catalyst

Tenacity

Thrill

The Thrill will be workably overstable for just about any arm, with strong resistance to turn even in strong headwinds. As a 21.5mm class GYRO® driver, the Thrill is designed to hit a midpoint of stability between two MVP Disc Sports models, the Phase and Photon.

(N)eutron (P)roton

Overstable
21.5mm Distance Driver

Defy

The Defy will be straight for a wide range of players and situations. For tailwinds and lower powered players, the Defy's overstable nature will come out. For light headwinds and higher powered players, the Defy will fly some remarkably straight and s-curve lines. As a 21.5mm class GYRO® driver, the Defy is designed to hit a midpoint of stability between two MVP Disc Sports models, the Photon and Wave.

(N)eutron (P)roton

Straight-Stable
21.5mm Distance Driver

Vanish

The Vanish will be straight to understable depending on the thrower and wind conditions. The Vanish's stability profile places it near a threshold of being straight at low power or in tailwinds, and controllably understable at high power or in mild headwinds. As a 21.5mm class GYRO® driver, the Vanish is designed to hit a midpoint of stability between two MVP Disc Sports models, the Wave and Orbital.

(N)eutron (P)roton

Understable
21.5mm Distance Driver

Fireball

The Fireball is overstable and wind-resistant like the MVP Motion, but has an overall straighter and longer flight profile. The Fireball has a longer forward push during its early stage of fade, where the Motion would have begun a long gradual fade. At the end of its flight the Fireball will drop later and more abruptly than the Motion.

(N)eutron (P)roton

Overstable
20mm Fairway Driver

Stable-Overstable

20mm Fairway Driver

The Wrath is a more turn-resistant complement to the Insanity. Just as the Insanity mimics a broken-in Inertia, the Wrath brings a worn-in flavor to the beloved Tesla flight profile. Power throwers will find the Wrath able to turn on command to stretch out and shape distance lines, while average throwers will see a bit of resistance useful for headwinds and fading lines. The low-speed fade of the Wrath is enough to range your shot and rein in a turnover line.

(N)eutron (P)roton

Neutral-Stable

20mm Fairway Driver

The Insanity is the first of our 20mm Distance Driver class for Axiom Discs, complementing the MVP 20mm class. The Insanity is best described as a worn-in MVP Inertia, with slightly more high speed turn and a diminished fade. For average power throwers the Insanity will be remarkably straight, while high power throwers can execute precise flip and turnover lines with ease. Whether you're looking for that sweet-spot worn disc flight, or you're looking to achieve bigger Inertia lines with less power, give Insanity a shot.

(N)eutron (P)roton PLASMA

Understable

20mm Fairway Driver

The Virus is Axiom's easiest to throw distance driver, with a glide and responsive understability that keeps it in the air. Power throwers will be able to flex huge turnover shots with straight forward fade. Average throwers will be able to extend and shape lines using the Virus' turn and gentle fade.

(N)eutron (P)roton

Overstable

17mm Fairway Driver

The Clash is a unique line-shaping complement to the Crave, built to open up more lines on the fairway. Wherever the Crave is too straight, or doesn't fade enough, the Clash picks up and shines. High-power throws will activate a greater turning phase than Crave to shape lines; however at any power level the Clash will fade more than the Crave. This yields a responsive and rangeable fairway driver.

(N)eutron (P)roton

Wrath

Insanity

Virus

Clash

Crave

Straight-Stable
17mm Fairway Driver

The Crave provides controllable straight flights with a great feel and loads of dual-color style. Relative to MVP drivers, the Crave is like a seasoned Servo. The popular “workhorse-stable” vibe is achieved with subtle wing contours that also feel great in the hand. The stability, range of weights, and easy throw make the Crave a GYRO® rig staple.

Neutron Proton PLASMA

Inspire

Understable
17mm Fairway Driver

The Inspire is the second fairway driver from Axiom Discs, and is an understable complement to the breakout hit Crave. Skilled players will be able to get smooth straight and turnover/flip lines from the Inspire, while beginners and lower-powered throwers will gain distance and usability from its understable nature. Inspire is the easiest-to-throw GYRO® driver.

Neutron Proton

Alias

Straight-Stable
12mm Midrange

The Alias is a straight-flying placement midrange similar to the popular Tangent, but with a bit more high-speed stability. This point-and-shoot midrange has the ability to lock into straight lines and hyzers, as well as pan out of high anhyzer shots and shallow helix lines. The Alias simply goes where it is sent.

Neutron Proton

Theory

Understable
12mm Midrange

The Theory is the perfect complement to the Alias. A flat release with moderate power will allow a gradual and predictable turn with great drift. Low power throwers can achieve very straight, neutral lines. Power throwers can also use this for consistent hyzerflips with an extended glide.

Neutron PLASMA

Envy

Stable-Overstable
10mm Putt & Approach

The Envy has a smooth modern feel that fits in the hand perfectly, lending confidence for both putt and approach duties. The Envy exhibits reliable high-speed stability and a minimal fade. With a slightly lower profile and cruising speed than the Ion and Anode class, the Envy is a uniquely “lid-like” stable putter.

Neutron + SOFT Proton PLASMA Electron + SOFT

Proxy

Straight-Stable
10mm Putt & Approach

The Proxy shares the Envy mold's core, lending the same low-profile feel and solid grip, along with a short wing width and wide flight plate diameter for superior glide. The Proxy sets itself apart from the Envy with a remarkably straight forward-fading finish. A bit of high-speed turn potential allows the Proxy's lines to be manipulated over a broad range of power, and helps less powerful throwers achieve straight putter drives.

Neutron + SOFT PLASMA

Premium Starter Set

The Axiom Premium Starter Set offers an easy introduction to the quality and style of Axiom Discs. Each boxed set includes three Axiom discs - one Electron putter, and one midrange and driver in an assortment of our Premium plastics: Plasma, Neutron, and Proton. These make excellent gifts for those who have never played, as well as disc golfers who don't know what to try from the Axiom lineup and Axiom fans looking for an easy booster pack. The Axiom Premium Starter Set is packaged in a heavy duty cardboard box with awesome full coverage color Axiom graphics, sized approximately 9" x 9" x 2".

MSRP \$39.95

Come join us at the annual festival of all things MVP, Axiom, and Streamline at GYROpalooza 2018. GYROpalooza kicks off with a tournament at the beautiful Marlette disc golf course where you can win prizes and put your GYRO® to the test against your fellow GYROnauts. After the tournament, we open up the factory to give you a chance to meet with Team MVP, MVP's top artists, and the founders of the company. You can also stamp your own GYROpalooza disc and get your disc customized at the factory by one of the artists!

Festival games, access to the largest collection of GYRO® on earth, and fun with everyone here at MVP will undoubtedly make GYROpalooza 2018 our greatest event yet!

BLACK HOLE®

The Black Hole® Portal Course Basket is the flagship model in the MVP Black Hole® Basket Series, built for disc golf courses and individuals seeking the highest performance and quality for the best price in the sport. The Portal boasts 3 tiers and 30 strands of high visibility stainless steel chains, symmetrically spaced for the best catching and error reduction on the market. All-metal construction is built for the demanding conditions of course installation and hardcore home practice. With permanent installation and portable base configurations available, the PDGA Championship Approved Portal is ready for any and all course-quality applications.

The Portal will be available in two configurations — with a portable base, or with a permanent installation kit — with all features above the base being identical. We will offer special pricing for 9 hole and 18 hole courses when all baskets are purchased together.

- Available with Portable Base or Permanent Installation Kit
- Seamless Matte header band in Black, White, Red, Blue, or Yellow
- Header galvanized followed by powder coated outer shell for extra durability and protection
- 30 high visibility stainless steel heavy duty course weighted chains
- Three symmetrically spaced complete tiers of chain for no weak spots
- Best ever catching design combining chain geometry, quality, and quantity
- PDGA Championship Approved
- Sturdy all metal construction, all joints welded
- Hot-dipped galvanized base, pole/sleeve, and cage
- Additional Permanent Sleeves and Poles available for multiple pins or converting Portable to Permanent
- Save with Drop Shipping from MVP Distribution Headquarters at no extra charge
- Unbeatable Pricing for 9 and 18 Hole Courses
- Covered by 20-Year Limited Warranty

MSRP \$449.95

AVAILABLE COLORS

COMING 2018 // Black Hole® Gravity

The Black Hole® Gravity is designed for the most realistic putting experience off the course or as a viable option for permanent use on the course. The Gravity is built to standard PDGA height and size regulations with added features of a Portal-style basket and added chains. The Black Hole® Gravity basket also features a seamless white matte powder coating and our double chain tiered design with 26 heavy duty galvanized course weighted chains, 13 outer and 13 inner chains with Black Hole® equidistant orientation for zero weak pockets.

AVAILABLE COLORS

Black Hole® Pro HD

The Black Hole® ProHD is designed for the most realistic premium putting experience off the course. Built to standard PDGA height and size regulations and assembles in under 1 minute. The Black Hole® ProHD basket also features a seamless black matte powder coating and our double chain tiered design with 30 high visibility zinc coated heavy duty course weighted chains, 12 outer, 12 middle, and 6 inner chains with Black Hole® equidistant orientation for zero weak pockets.

MSRP \$179.95

Black Hole® Pro

The Black Hole® Pro is designed for the most realistic putting experience off the course. Built to standard PDGA height and size regulations and assembles in under 1 minute. The Black Hole® Pro basket also features a seamless black matte powder coating and our double chain tiered design with 24 high visibility zinc coated heavy duty course weighted chains, 12 outer and 12 inner chains with Black Hole® equidistant orientation for zero weak pockets.

MSRP \$159.95

Black Hole® Precision

The Black Hole® Precision is designed to hone your putting routine with unforgiving difficulty. Built to standard PDGA height and size regulations and assembles in under 1 minute. The Black Hole® Precision basket also features a seamless black matte powder coating and 12 high visibility zinc coated course weighted chains. A narrowly focused target area at just 12" chain tier diameter pushes your accuracy to the limit.

MSRP \$139.95

Black Hole® Practice

The Black Hole® Practice is designed for high quality, lightweight, and affordability. Built to standard PDGA height and size regulations and assembles in under 1 minute. The Black Hole® Practice basket features a seamless black matte powder coating and our double chain tiered design with 24 high visibility zinc coated lightweight chains, 12 outer and 12 inner chains with Black Hole® equidistant orientation for zero weak pockets.

MSRP \$134.95

Black Hole® Macro

Expansion of the Black Hole® universe continues with the new Black Hole® Macro! The Black Hole® Macro stands at 39" tall with an 18" diameter (99cm x 45cm) making it essentially a 3/4-scale disc golf basket! Throwing on a basket this size feels like a sport, not a toy game or miniaturization. With two tiers of 12 chains each, totaling 24 strands, the Black Hole® Macro will not be letting good shots past.

MSRP \$109.95

Black Hole® Mini

The Black Hole® Mini is designed to be the best Mini Disc Golf basket on the market. The 26-inch basket is designed in the Black Hole® style but built for mini discs. The Mini basket also features a seamless black matte band and our double chain tiered design with 24 mini scale strands, 12 outer and 12 inner chains with Black Hole® equidistant orientation for zero weak pockets. Perfect for fun around the house or a place to store your mini discs!

MSRP \$89.95

Black Hole® Micro

The Black Hole® Micro is designed to #growthesport by taking disc golf to the desk! The Micro stands at 6.5" in height with 1/8" welded wire construction with signature Black Hole® style. A great conversation piece and perfect scale for coins and bottle caps.

Lunar Module LED Basket Light

MSRP \$8.95

A technological advancement in basket lighting has led us to the Lunar Module LED basket light. This light is fully remote controllable, offering many different color lighting options at the push of a button. Elevate your Glow rounds with these premium basket lights.

Event Horizon Disc Golf Basket Light

MSRP \$8.95

Illuminate your basket! 13cm diameter, 6mm thin, magnetic attachment to basket, 7 powerful LEDs, 2 replaceable 3V button cell batteries, 6-8 hours steady brightness and up to 48 hours night visibility.

MVP Tri-Lit LED

MSRP \$2.95

Introducing the new and improved Tri-Lit LED Lights by MVP Disc Sports. These familiar micro LED units are designed to be taped to the center of a disc for night play, but can be used in a variety of creative ways. A button located between the three lights under the printed MVP logo circuit cover switches power on/off. This Multicolor model auto-cycles beautifully through a range of vibrant color and flash modes using blends of its three LED lights.

MVP UV Flashlight

MSRP \$7.95

Kick your night golf up to the next level by charging your glow the right way - with MVP-approved UV light! Glow-in-the-dark material charges quicker and stays glowing longer when charged with UV light. The MVP UV Flashlight uses a familiar compact form factor and packs a powerful UV bulb and 3 AAA replaceable batteries (included). Each MVP UV Flashlight is black with metal casing and features MVP and Eclipse™ Glow logos. Densely-packed Eclipse™ Glow Proton charges quickly and efficiently with the MVP UV Flashlight applied directly to the glow surface.

UFO Glow Rings

MSRP \$4.95

Sometimes "glow golf" just isn't the same with LEDs, and for those players MVP Distribution HQ is proud to offer UFO Glow Rings! These adhesive sticker packs bring an evenly-weighted and removable solution to make any disc glow-in-the-dark.

MVP Fusion Sticks

MSRP \$1.95

Radiate your focus on the chains with new MVP Fusion Sticks! These glow-in-the-dark sticks are activated by snapping in half and include a hook and string for quick hanging and removal from any basket in play. Fusion Sticks come one per package in available colors of Red, Blue, or Green. Disc golfers' primary use for Fusion Sticks is for nighttime play - simply hang a Fusion Stick on your target and it's visible from a great distance without blinding the player. Fusion Sticks make a great add-on for evening events, holiday gift packs, giveaways, and night golf bundles.

MVP/Axiom/Streamline Towels

MSRP \$11.95

An essential accessory in any disc golfers bag, these high-quality golf towels have embroidered logos and attached clips, ready to be attached to your bag and help keep your grip consistent.

**Osmosis Sport Bag**

MSRP \$7.95

Optimize your grip with the Osmosis Sport Bag! A quick toss of this compact rectangular sport bag will prep your throwing hand for perfect grip and a clean release. Keep one in the bag and never sweat your grip again. The Osmosis Sport Bag is available with MVP, Axiom, or Streamline logo printed on green, red, orange, pink, black, blue, yellow, or light blue. Makes a great gift or player's pack idea!

**Osmosis Sport Ball**

MSRP \$7.95

Optimize your grip with the Osmosis Sport Ball! A quick toss of this compact spherical sport bag will prep your throwing hand for perfect grip and a clean release. Keep one in the bag and never sweat your grip again. The Osmosis Sport Ball is available with MVP, Axiom, or Streamline logo printed on green, red, orange, pink, black, blue, yellow, or light blue. Makes a great gift or player's pack idea!

**MVP Logo Water Bottle**

MSRP \$13.95

Stay hydrated in style with the MVP Logo Water Bottle! This sleek translucent plastic water bottle features 700ml capacity in BPA Free recyclable material, with a heavy duty hinged carabiner clip built in. The top pops open with a hinged cap for drinking, and unscrews for refills. Available bottle colors are black, red, blue, and lime. Every orbiter needs hydration so choose the MVP Logo Water Bottle!

**MVP Circuit Events Clipboard**

MSRP \$4.95

Switch on your circuit board with the MVP Circuit Events Clipboard! This compact 4.5" x 6" clear plastic clipboard features a strong metal clip and quality white screen print MVP Orbit and Circuit Events logos. These clipboards are stylish and efficient, giving players some #ThrowGYRO flair while they document birdies for the hole. Makes an excellent add-on for Circuit Events, retail stores, holiday gift packs, player's packs, and giveaways.

**HIVE Disc Claw Retriever**

MSRP \$19.95

The Claw from Hive Disc Golf is an improved underwater disc retriever that does double the disc catching and a fraction of the soil disruption. Four claw-like prongs do all the work of snagging your sunken disc above or below the Claw, while its center bar combs above the soil rather than unnecessarily dredging up the full width into a cloudy-watered mess. Comes with long string and a ring on the end to prevent slip-outs when tossing into the water.

AVAILABLE COLORS:

Gyro Spinners

MSRP \$14.95

These 58g spinners are machined from aluminum and spin for minutes on end. Spinner colors include blue, gold, and black. The center caps are engraved with an MVP Orbit logo and GYRO® logo. With their hefty construction the gyroscopic effect is quite pronounced - when spun up, the spinner will resist even slight changes in orientation. The same physics that make the spinner resist slight turns in your hand are echoed in a flying GYRO® disc, resisting wind and torques that can otherwise produce unpredictable shots, holding the disc in an efficient wing orientation for longer.

MVP Memo Cube with Micro Pallet

MSRP \$9.95

Like our discs, this memo pad will be a conversation starter. The stack of memo sheets combine to produce an MVP Distribution HQ logo on each side, and the wooden micro pallet underneath makes the whole setup look like something out of a top secret warehouse.

Dimensions for the Memo Cube are 3.25" x 3.25" x 2.75" including pallet. We imagine these memo pads will primarily be used by dealers for office or front counter duty, but diehard Gyronauts will want one for their home office!

GYRO® Wristbands

MSRP \$1.95

Show off your favorite disc golf brands with the MVP and Axiom silicone wristbands. MVP wristbands feature the classic black and white, while the Axiom wristbands are available in many vibrant color options.

MVP Rubber Key Chains

MSRP \$1.95

Rubber MVP Orbit logo keychain and attached metal clip for quick access and use.

MVP Carabiners

MSRP \$1.95

One of our most handy supplementary accessories, use the MVP carabiner to attach towels or other accessories with ease.

MVP Bottle Opener

MSRP \$2.95

Be prepared in the kitchen or out on the course with this heavy gauge metal bottle opener with grippy rubber MVP cover.

Patches

MSRP \$4.95

Add a bit of flare with these MVP Axiom and Streamline patches. These embroidered patches come in colors ranging from MVP's classic black and white to many different color options with Axiom and Streamline.

MVP Orbit Koozies

MSRP \$4.95

Keep your beverage cold and show off your favorite disc golf brand with MVP and Axiom insulated drink koozie.

Axiom Hatch Logo Koozies

MSRP \$4.95

Indulge your inner punk and sip away a cold beverage with this Axiom branded insulated drink koozie.

MVP Orbit Bag Tags

MSRP \$4.95

Show off your favorite disc golf brand with the MVP Orbit bag tags! Available in Black, Pink, Blue, Red, Green and Yellow.

MVP Tripod Stool

MSRP \$15.95

Great for use in a round of disc golf or out on a nature hike, this premium sturdy MVP Tripod stool collapses for easy storage and provides a comfortable seat on the go.

MVP Orbit Umbrella

Protect yourself and your equipment from the elements with the MVP Orbit Umbrella. This large 68" and standard 23" umbrella are designed to help keep you dry when the weather is less than cooperative.

Lanyards

MSRP \$1.95

Show off your favorite disc golf brand with embroidered lanyards from MVP, Axiom, and Streamline. Lanyards come in colors ranging from MVP's classic black and white to many different color options with Axiom and Streamline.

MVP & Axiom Vinyl Stickers

MSRP \$3.95

High grade vinyl window decals for any use. Represent MVP and Axiom wherever you go. MVP "Orbit" Available in multiple new colors!

MVP logo
MVP "Throw GYRO"
MVP Orbit
Axiom Pyramid
Streamline Discs

MVP "Orbit" Colored Vinyl Stickers

MSRP \$3.95

High grade vinyl window decal for any use. Represent MVP wherever you go. MVP "Orbit" logo now available in multiple new colors!

AVAILABLE COLORS:

MVP Markers

MSRP \$1.95

Tag your discs and various disc golf equipment with the MVP Markers. A must have essential item for the disc golf bag.

MVP Golf Pencils

MSRP \$0.75

Never be without your MVP Golf Pencils. Keep score and represent MVP Disc Sports through every round that you play.

MVP Scorecards

MSRP \$1.95

Keep score and represent MVP with the MVP scorecards. They come with full color printed Circuit Events header and enough room for everyone during your disc golf rounds.

MVP "Tesla" License Plate

MSRP \$4.95

Show off your favorite disc golf brand with the new MVP "Tesla" License Plate. The plate is adorned with the iconic Tesla disc that will surely electrify the front of your ride. License plate measures 6"x12".

**MVP "Electrify" Mouse Pad**

MSRP \$4.95

Electrify your game and bring MVP with you from the course and into the office with the MVP mouse pad. The low drag full-color screen printed pad features the MVP Volt fairway driver and can bring a little more disc golf to your home or office.

**MVP Shipping Boxes**

MSRP \$1.95

MVP fans and collectors make up a huge international community of dealers and traders. Gyronauts and shippers want their plastic to survive each mailing trip unscathed, and to that end MVP is offering shipping boxes for every size shipment. These are not for retail resale, but we believe that shipping to your customers in an MVP-branded box will increase loyalty to your outlet versus dealers who ship with unbranded methods, as your buyers will then reuse MVP boxes to ship their personal trades. Think inside the box with high quality secure shipping, but let that box reflect the beloved GYRO® within.

Sizes include: Single Disc Box, Double Disc Box, Small Mailing Box (8.5 x 8.5 x 4", 5-7 discs each), Small Cube Box (8.5 x 8.5 x 8.5", 12-15 discs each), and Large Storage Box with handles (17 x 8.5 x 8.5" with handles, 25-30 discs each). Each box size comes in a pack of 20.

MVP Vinyl Banners

MSRP \$12.00

A full lineup of banners featuring MVP Axiom, and Streamline Discs brands. Perfect for any shop or superfan! Featuring new Plastics Technology, Axiom Renaissance banners.

- A. Streamline Discs Banner- 2'x6'
- B. MVP "Plastics Technology" Banner- 2'x6'
- C. Axiom "Renaissance" Banner- 2'x6'
- D. MVP Banner- 2'x6'
- E. MVP "Electrify" Banner -2'x4'
- F. Axiom "Geometry" Banner 2'x4'

Flight System Posters 12"x24" Lineup

New poster featuring the entire lineup of Black Hole® and Axiom Pro Baskets in scale to one another. Allow your customers to learn about specifications and standard MSRP for each one.

MVP Product Display Rack System

Base \$150.00

We've engineered the MVP Retail Display Rack to look great and do a better job of helping your buyers shop for plastic. Our Easy Access style of arranging discs horizontally takes up less space and allows shoppers to quickly see and grab ANY disc off the rack.

The MVP Retail Display Rack will be FREE with any wholesale order of 300 or more discs. On your order of 300 or more discs, you must enter a quantity of 1 into the order form field for Retail Display Racks, and the wholesale cost of the rack will be credited in your order total.

Free with 300-disc orders
